EDUCATION

Southern New Hampshire University **Manchester, New Hampshire**
B.S. in Computer Science *Graduated May 2026*

- **Concentration:** Software Engineering
- **GPA:** 3.6/4.00

EXPERIENCE

FIFA World Cup 2026 **Arlington, Texas**
Network Technician *Jun 2026 - Jul 2026*

- Maintained the media tribune network at AT&T Stadium as part of the venue technology team, holding 100% network uptime through the tournament.
- Worked the incoming support ticket queue for media and broadcast staff, and held live standby during matches to respond to failures in real time.

Sportec Solutions AG **Arlington, Texas**
VAR Technical Manager *Oct 2024 - Present*

- Operate and monitor technical video services for MLS and other competitions from a centralized control center, holding 100% operational uptime by catching network latency and hardware faults pre-broadcast.
- Administer stadium-based Linux Jetson servers over secure CLI through Windows front-end software and VNC Viewer.
- Configure real-time camera plans through Linux terminal commands on remote Jetson units for precise video stream alignment during live matches.

GardaWorld **Dallas, Texas**
Security Officer *Mar 2023 - Aug 2024*

- Monitored multi-camera CCTV surveillance networks across a high-value construction site on 24/7 rotating coverage.
- Logged incidents and documented irregularities, producing the reporting trail used in theft and liability claims.

Amazon **Charlotte, North Carolina**
Data Entry Operator *Jan 2021 - Jan 2023*

- Processed thousands of records per month at 99.8% accuracy on AWS cloud storage, and built Tableau dashboards that surfaced workflow bottlenecks and cut document retrieval time 15%.

PROJECTS

Taskboard **github.com/ckwame-jpg/taskboard**
FastAPI, *Next.js*, *PostgreSQL*, *SQLAlchemy*, *WebSockets*, *JWT*, *Docker*

- Real-time collaborative task board where card moves sync instantly across every connected client over WebSockets.
- Role-based permissions for owner, editor, and viewer roles with an invite system. Fully Dockerized deployment.

URL Shortener with Async Analytics **github.com/ckwame-jpg/url-shortener**
FastAPI, *PostgreSQL*, *Redis*, *Celery*, *SQLAlchemy*, *JWT*, *Docker Compose*, *pytest*

- Click analytics offloaded to Celery workers so redirects stay fast, logging device, referrer, and IP.
- Four-service Docker Compose stack (API, worker, PostgreSQL, Redis) with JWT auth and GitHub Actions CI.

Fantasy Football Toolkit **github.com/ckwame-jpg/fantasy-tool**
Next.js 15, *React 19*, *TypeScript*, *FastAPI*, *Tailwind CSS*, *Sleeper API*

- Mock draftboard with ADP rankings and tiers, VORP-based trade analyzer, waiver wire rankings, and weekly lineup optimizer.
- Integrates the Sleeper API to sync live league rosters and scoring settings. Live demo deployed on Vercel.

SKILLS

Programming: Python, TypeScript, JavaScript, SQL, C#, HTML/CSS
Frameworks: FastAPI, Next.js, React, SQLAlchemy, Tailwind CSS
Tools: Docker, PostgreSQL, Redis, Linux, Git, CI/CD, AWS (S3), Vercel, Agile
